## EXTENDS THE LIFE OF YOUR BUDGET

The average new car is out of warranty in just two and a half years. With advanced electronics and “integrated systems,” repairing or replacing parts is more expensive than ever.

When you add in labor costs that can reach \$125 per hour or more, a single repair can easily cost more than a whole year’s worth of car payments.

### **THE TOTAL COST OF MMP IS OFTEN FAR LESS THAN THE COST OF A SINGLE REPAIR!**

Experts agree it makes financial sense to keep your vehicle as long as possible. MMP makes it affordable. Pay for MMP once, and in most cases you will not have to pay anything more than a small deductible should a breakdown occur.

Plans are available for most new and used domestic and imported vehicles. For maximum value, consider adding MMP protection when you purchase a new or used vehicle.

*Ask your loan officer or service representative for vehicle eligibility criteria and more details.*
